PRODUCT INFORMATION

**Shift+ Landscape
Mobile shelving elements.**

Structure of glued linear and curved (60°) carcasses on a steel cross-member with 4 or 6 (60°) technical castors, 2 or 3 of which are lockable.

Carcass made of melamine-resin-coated LIGNOpal chipboards with glued-on plastic edge. With glued centre walls for partitioning the carcasses. With rows of holes (25 mm) for adjustable shelf inserts and a perforated-plate back panel. Depending on the model with plastic boxes on guide rails.

Function: With magnets on the outer sides for docking further cabinet elements. Curved Landscape seating and cabinet elements can be combined linearly and, thanks to the matched inner and outer radii, back to back to create circular and serpentine seating/cabinet landscapes.

Push-handles made of steel on the top of the carcass.

The following material groups are available to choose from: Carcass made of LIGNOpal: L1,(white); Perforated-plate: M2,3,10.
